PRODUCT INFORMATION

DuPont[™] Hytrel[®] 40CB THERMOPLASTIC POLYESTER ELASTOMER

Product Information

Common features of Hytrel® thermoplastic polyester elastomer include mechanical and physical properties such as exceptional toughness and resilience, high resistance to creep, impact and flex fatigue, flexibility at low temperatures and good retention of properties at elevated temperatures. In addition, it resists many industrial chemicals, oils and solvents. Special grades include heat stabilised, flame retardant, food contact compliant, blow molding and extrusion grades. Concentrates offered include black pigments, UV protection additives, heat stabilisers, and flame retardants.

Hytrel® thermoplastic polyester elastomer is plasticiser free.

The good melt stability of Hytrel® thermoplastic polyester elastomer normally enables the recycling of properly handled production waste. If recycling is not possible, DuPont recommends, as the preferred option, incineration with energy recovery (-24 kJ/g of base polymer) in appropriately equipped installations. For disposal, local regulations have to be observed.

Hytrel® thermoplastic polyester elastomer typically is used in demanding applications in the automotive, fluid power, electrical/electronic, consumer goods, appliance and power tool, sporting goods, furniture, industrial and off-road transportation/equipment industry.

Hytrel® 40CB is a black master batch which can provide improved UV resistance when blended with other Hytrel® grades.

General information		Value	Unit	Test Standard	
Resin Identification		TPC-ET-CD	-	ISO 1043	
Part Marking Code		TPC-ET-CD	-	ISO 11469	
Thermal properties		Value	Unit	Test Standard	
Melting temperature, 18°F/min		154	°C	ISO 11357-1/-	3
Flammability		Value	Unit	Test Standard	
FMVSS Class		В	-	ISO 3795 (FMV	(SS 302)
Burning rate, Thickness 1 mm		<100	mm/min	ISO 3795 (FMV	'SS 302)
Electrical properties		Value	Unit	Test Standard	
Dissipation factor				IEC 62631-2-1	
100Hz		60	E-4		
1MHz		100	E-4		
Volume resistivity		>1E13	Ohm*m	IEC 62631-3-1	
Electric strength		34	kV/mm	IEC 60243-1	
Comparative tracking index		300	-	IEC 60112	
Injection		Value	Unit	Test Standard	
Drying Recommended		yes	-	-	
Characteristics

Processing	Film Extrusion	• Otl	 Other Extrusion 		Casting
-	 Profile Extrusion 	• Co	Coating		-
Delivery form	Pellets				
	North America	• Asi	ia Pacific	•	Near East/Africa
Regional Availability	• Europe	• Sou	uth and Central America		Global

Processing Texts

Injection molding PROCESSING

Generally, processing conditions used with the standard types of Hytrel® will be satisfactory for blends containing Hytrel® 40CB. To ensure good mixing during injection moulding, higher than normal back pressures should be employed.

For very thin parts more thorough mixing may be required. This can be done by extrusion blending and pelletizing prior to injection moulding.

Symbols used:

possibly resistant

Defined as: Supplier has sufficient indication that contact with chemical can be potentially accepted under the intended use conditions and expected service life. Criteria for assessment have to be indicated (e.g. surface aspect, volume change, property change).

X not recommended - see explanation

Defined as: Not recommended for general use. However, short-term exposure under certain restricted conditions could be acceptable (e.g. fast cleaning with thorough rinsing, spills, wiping, vapor exposure).

Contact DuPont for Material Safety Data Sheet, general guides and/or additional information about ventilation, handling, purging, drying, etc. ISO Mechanical properties measured at 160 mil (Hytrel® measured at 80 mil), IEC Electrical properties measured at 80 mil, all ASTM properties measured at 120 mil, and test temperatures are 73°F unless otherwise stated.

The information set forth herein is furnished free of charge and is based on technical data that DuPont believes to be reliable and falls within the normal range of properties. It is intended for use by persons having technical skill, at their own discretion and risk. This data should not be used to establish specification limits nor used alone as the basis of design. Handling precaution information is given with the understanding that those using it will satisfy themselves that their particular conditions of use present no health or safety hazards. Since conditions of product use and disposal are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information. As with any product, evaluation under end-use conditions prior to specification is essential. Nothing herein is to be taken as a license to operate or a recommendation to infringe on patents. Caution: Do not use in medical applications involving permanent implantation in the human body. For other medical applications, discuss with your DuPont customer representative and read Medical Caution H-50103-5.
